

CORPORATE PROFILE

Ditium Technologies is a Communications Workflow company and a leading Software Solutions provider, focusing on developing software products and solutions for enhancing business communications. Established in 1994, our strengths lie in Communications Workflow solutions, Fax/SMS/Telex Server technology and Contact/Database Management Systems. Ditium's range of products can be integrated into a Communications Framework, providing businesses unparalleled flexibility in growing their communications requirements.

Our Vision:

To be established and recognised as a quality provider of Communications Workflow Solutions to businesses worldwide.

Our Team:

Ditium's management team is driven by a passion for new and innovative technologies while it's team of Technical Engineers, Product Specialists and Software Developers have earned a reputation as being experts in the field of unified messaging systems, fax server technologies, forms processing and business workflow.

Ditium is committed to its customers and channel partners and believe that its success is dependent on the quality of its customer service and the satisfaction of its channel partners.

Product Offerings:

Together with its technology partners, including global leaders IBM and Avaya, as well as products from Captaris, Verity and Brooktrout, Ditium strives to provide our customers with the tools needed to meet the communications challenges of the future. These products are integrated into the Umero platform.

Umero, a powerful and highly flexible communications workflow engine allows users and developers to easily "Communications Enable" their applications. Its flexible nature also allows these backend applications to integrate and participate in the workflow via connectors to various Customer Relationship Management Systems (CRM), HelpDesk Systems, Enterprise Resource Planning Systems (ERP), Supply Chain Management Systems (SCM), Document Management Systems (DMS), Accounting Packages and other leading Databases. Umero's Workflow Configurator allows for the graphical configuration of structural processes. This makes designing and implementing processes and transactions between human-to-application, human-to-human, application-to-application and internal-to-external parties are all highly intuitive and simple to use.

Ditium is the authorised reseller/distributor in the region for Captaris' RightFax network fax server and eDocuments delivery systems; Captaris' Alchemy suite of archival, retrieval and global access software applications; Verity's TELEform ICR, OCR, barcode and data capture for forms; Verity's LiquidOffice Enterprise eForms Management System; and Brooktrout's enterprise fax and voice cards.
