

*Enabling the
Intelligent Enterprise*

About Elixir Technology

Elixir Technology provides a Unified Business Intelligence Platform for end-to-end information life cycle coverage from Extraction-Transformation-Loading (ETL), Data Aggregation, Cube, Reporting, Dashboard and Activation.

Our flagship product, Elixir Report™, has garnered over 600 worldwide customers across 50 countries in various vertical industries such as government, financial services, telecommunications, healthcare, retail, and technology. Going beyond enterprise reporting needs, our advanced Integrated Business Intelligence Suite, Elixir Repertoire™, is designed to further empower our customers toward becoming intelligent enterprises, where critical information is readily available to drive decisions and actions.

Elixir Technology is headquartered in Singapore, with an R&D arm in UK. Through our network of partners, Elixir's products are represented in many parts of the world across major continents including Asia, Americas, and Europe, Middle East and Africa (EMEA).

Our Core Competency

Elixir's core competency lies in our longstanding craftsmanship in software tool making, having produced a series of well-engineered, highly flexible and extensible developer tools. With the founders having deep software engineering background, such best practices are incorporated into all our products resulting in an accelerated development time frame as the products mature through the usual software life cycle. With this foundation, Elixir is now focusing on Business Intelligence tools and practices, providing a unified platform for end-to-end Business Intelligence needs.

Our Mission

To enable more customers to become intelligent enterprises to compete in a fast changing world.

Our Vision

To be a global leader in business intelligence tools and practices, providing pragmatic, adaptive, and cost effective solutions.

Enabling the
Intelligent Enterprise
